

Auditing is one of the oldest professions

How the world changed in the last decade

How auditors changed from the old days ...

**From compliance checking to value
adding...**

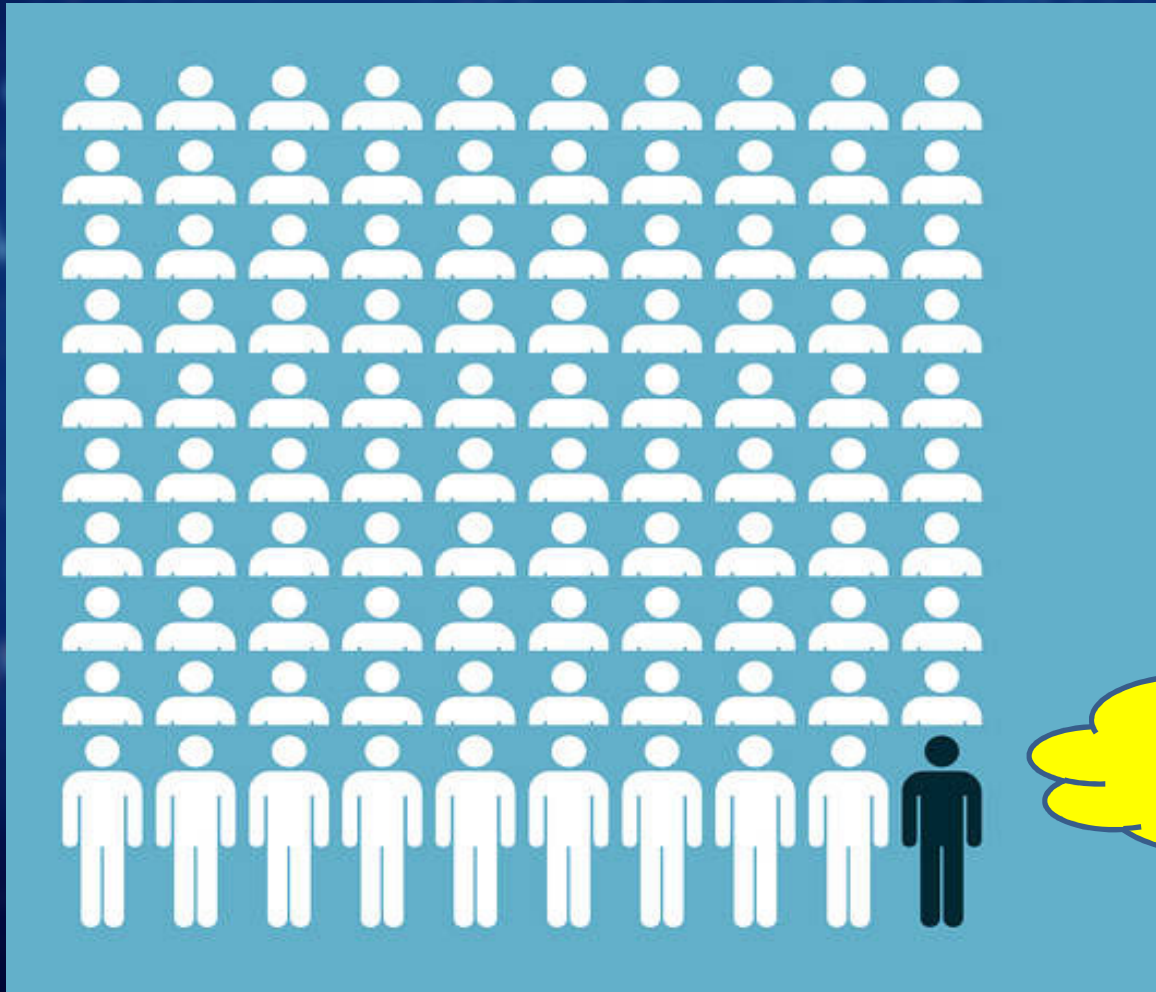

Does any of these apply to your IA function?

- **Audit discontinued products or services**
- **Check adherence to poorly design procedures**
- **Always recommend more controls or documentation**
- ...

Our audit universe is like the Cosmos

Warning: Please Do NOT try to audit everything

**IA accounts for 1%
of workforce or less**

Top talent is not in IA...

Disrupt IA...some old news...

- **No audit report**
- **No audit plan**
- **No auditor**
- **Achieve IA objectives without auditing**

***Are we challenging the status quo
or part of the status quo?***

My humble thoughts on the future of IA
